

# CAB, SLEEPER & SEAT AIR SPRINGS

## FEATURES & BENEFITS

- » Chemically-formulated vulcanized material withstands ozone effects that lead to air loss
- » 100% leak tested to ensure reliable performance

## RELATED PARTS

It is highly recommended to replace shocks and height control valves (if applicable) when replacing the suspension air springs.

## CAB, SLEEPER & SEAT AIR SPRINGS

Chemically-formulated to resist cracking and air loss, TRP Air Springs for cab, sleeper and seat air suspensions maintain a smooth ride and handling of the cab and sleeper. Keeping the air suspension in working order prevents damage to expensive cab components and helps decrease driver fatigue.
