TRP® CLEANBLUE®

DIESEL EXHAUST FLUID (DEF)

All 2010 engines using select catalytic reduction (SCR) technology will be equipped with a tank for DEF. From the tank, DEF is routed to the exhaust system where it is injected into the hot exhaust gas stream. The DEF vaporizes, forming into ammonia and carbon dioxide. With the help of the SCR catalysts, ammonia then converts nitrogen oxide to harmless nitrogen and water, which ensures EPA 2010 compliant truck emissions.

TRP CleanBlue is certified by the American Petroleum Institute (API). Poor performance, EPA liability and fouled injectors are a few problems that can result from using DEF that is not API certified.

Safe to handle and store, TRP CleanBlue is non-toxic and non-hazardous. If stored in moderate temperatures, shelf life can be in excess of one year. In either hot or cold extremes, shelf life can degrade to 6 months. Storage outside is not recommended.

PRODUCT OFFERING

TRP®	Description
CB0025	CleanBlue - TRP DEF 2.5 Gallon Jug
CB0550	CleanBlue - TRP DEF 5.5 Gallon Drum
CB2750	CleanBlue - TRP DEF 275 Gallon Tote (Disposable)
CB3300	CleanBlue - TRP DEF 330 Gallon Tote

FEATURES & BENEFITS

- » High Purity Requirements
- » ISO 22241-1
- » API Certification
- » Non-Flammable
- » Non-Hazardous
- » Stable and Colorless
- » Non-Toxic and Non- Polluting
