

TRP Clutch Program

Clutch Assemblies

TRP Clutch Assemblies

The TRP line of clutches offers the widest product breadth of any clutch program in North America. TRP offers Easy Effort®, Soft Pedal®, Medium Duty, and Angle Spring® clutches. The Easy Effort clutches follow the latest production design incorporating coil spring technology. Three assist springs serve to lower bearing load, and lower pedal effort. Soft Pedal clutches are state of the art diaphragm spring technology resulting in smoother engagement. Drive strap design provides a smoother transfer of energy and avoids the internal friction causing metal wear. For medium duty and heavy duty applications, TRP will have a clutch that will meet your requirements and exceed your expectations.

■ Features and Benefits:

- ★ All new components and castings for extended life
- ★ Easy Effort® and Soft Pedal® clutches reduce foot pedal effort by 30% resulting in less driver fatigue
- ★ The TRP program includes Mack application clutches for ease of ordering all clutches under one program
- ★ Assembled in the USA and backed by TRP
- ★ 18 month warranty (when installed at dealership)
