

SPRING BRAKE CHAMBERS

FEATURES & BENEFITS

- » Complies with SAE J1469 force output requirements for parking brake performance
- » Return springs meet or exceed 1 million cycles
- » Heavy-duty diaphragm is highly resistant to abrasion

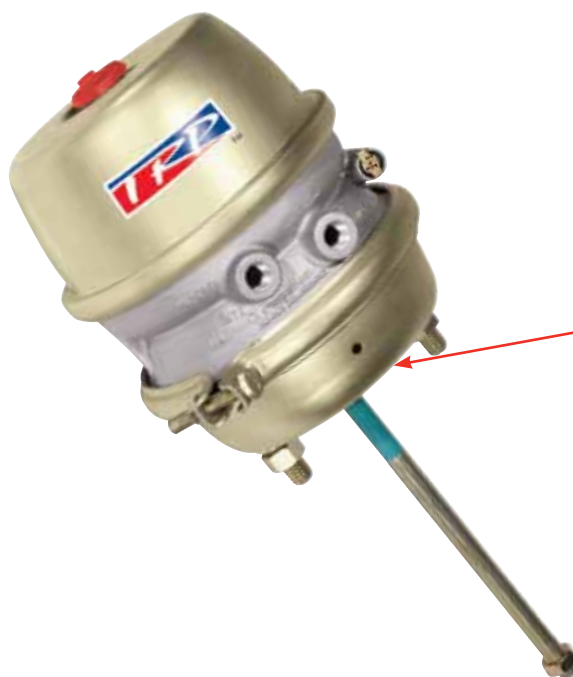

RELATED PARTS

- » Slack Adjusters
- » Brake Shoes
- » Brake Drums
- » Camshafts

SPRING BRAKE CHAMBERS

TRP Spring Brake Chambers feature an 8-gauge service housing, OE main power spring as well as OE return springs. The bottom of the service housing contours to complement the 8-gauge steel for added strength. The double o-ring design prevents air leakage between the packing chamber and service chamber, making TRP Spring Brake Chambers robust and reliable.

TRP® stamped into service chamber
